

CONGRATULATIONS!

And Welcome to our family! You now own a professional-grade product, used by renowned artists world-wide! Every COSTALAB product is hand-built in Italy with the finest components, for maximum performance and outstanding reliability. We check and test every single pedal before it reaches your home to be sure it works as it's designed for and that is free from defects of any kind.

WARRANTY

COSTALAB warrants the product to be free from defects in manufacturing for a period of two (2) years from the date of purchase.

The Warranty is only valid if the product is used as recommended and as it's intended. Proof of ownership may be required in the form of a purchase receipt.

EXCLUSIONS

The warranty does not cover damages caused by misuse, wrong power supply, abuse, unauthorized

modification, improper storage, lightning, or natural disasters.

The warranty does not cover knobs, rubber feet or any wearable component.

The warranty does not cover any shipping cost for repairing.

LIMIT OF LIABILITY

Costalab will not be held liable for any damage caused by the failure of this product. Damages excluded include, but are not limited to, the following: lost profits, damage to other equipment or inability to use this product.

By using the product, the user accepts all terms herein.

HOW TO OBTAIN SERVICE

contact COSTALAB through our website at www.costalab.com or contact any authorized dealer (full list on our website).

COSTALAB FOUNDER AND BUILDER

COSTALAB BOOSTER FAT

A Boost is a simple but very effective stompbox for guitar, it's an old "trick" used by professional musician that want to be heard and stand out of the mix and the Costalab Booster Fat is a classic among classics, since is the pedal that started it all.

Being the first act of the Costalab adventure the Booster, now Booster Fat, has some unique features such as +26db of pure clean boost and a smooth top end to avoid unpleasant harmonics when pushing an amp.

Usually a Boost is used in two way: one, the most popular, at the beginning of the chain to push drive pedals or at the end of it, to raise the overall volume for more presence during solos.

But having a range of clean boost that goes from 0 to +26db, the Costalab Booster Fat, can be also used in the effect loop as an attenuator for loud tube amps.

The Booster Fat, like all the Costalab line-up, is built with premium components that guarantee noise-free performance and is fitted with True bypass switching and an anti-pop filter for transparent smooth operation.

External power supply: it is possible to power the pedal with an external center-negative 9 volt DC power supply with standard 2.1mm DC connector. Current draw is less than 20 mA.

We suggest to use our filtered and stabilized **ENERGIA** or **POWER FACTORY** power supplies or an equivalent quality one. Using a different power supply may generate unwanted noise and may damage the product. When an external power supply is plugged, the battery is excluded.

Dimensions: 37x92x30mm excluding knobs and jacks.
