

CONGRATULATIONS!

And Welcome to our family! You now own a professional-grade product, used by renowned artists world-wide! Every COSTALAB product is hand-built in Italy with the finest components, for maximum performance and outstanding reliability. We check and test every single pedal before it reaches your home to be sure it works as it's designed for and that is free from defects of any kind.

WARRANTY

COSTALAB warrants the product to be free from defects in manufacturing for a period of two (2) years from the date of purchase.

The Warranty is only valid if the product is used as recommended and as it's intended. Proof of ownership may be required in the form of a purchase receipt.

EXCLUSIONS

The warranty does not cover damages caused by misuse, wrong power supply, abuse, unauthorized

modification, improper storage, lightning, or natural disasters.

The warranty does not cover knobs, rubber feet or any wearable component.

The warranty does not cover any shipping cost for repairing.

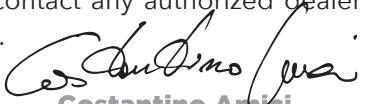

LIMIT OF LIABILITY

Costalab will not be held liable for any damage caused by the failure of this product. Damages excluded include, but are not limited to, the following: lost profits, damage to other equipment or inability to use this product.

By using the product, the user accepts all terms herein.

HOW TO OBTAIN SERVICE

contact COSTALAB through our website at www.costalab.com or contact any authorized dealer (full list on our website).

Costantino Aruci
COSTALAB FOUNDER AND BUILDER

COSTALAB ECHOLAB

The COSTALAB Echolab is a unique-design, vintage-sounding, ultra-silent analog delay, capable of taking you back in time with the warmth and that precious imperfection of the great echoes of the past. It does so because it is built following the same philosophy of the golden-era tape echoes: at its heart beats a bucket brigade chip capable of 750 ms of delay time, paired with a high-quality, state-of-the-art Op-Amp that enhances your guitar tone in a warm and perfectly transparent way.

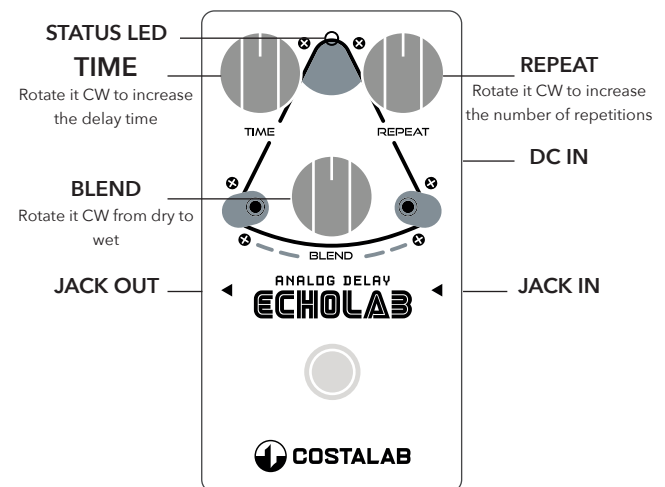

The Echolab is a two-faced delay. It can sit back behind your tone during guitar solos, adding just the space you need to achieve "that" sound, but it can also assert itself with authority on the most percussive rhythm parts.

The Echolab's repeats are characterized by an intentional progressive degradation that gives the effect a unique three-dimensionality, capable of supporting your playing with a natural and musical spatiality.

Operation is immediate and intuitive: find your setup and let yourself be followed by a delay that responds dynamically to your touch, from the most delicate brush of the strings to the most aggressive pick attack.

For an even more dynamic experience and improved signal-to-noise ratio, power the pedal at 12 volts.

Warning: do not exceed this voltage, or the circuit will be permanently damaged.

The Echolab, like the entire Costalab lineup, is equipped with True Bypass and an anti-pop filter, for transparent and artifact-free integration into your signal chain.

The unit is powered by 9-12 DC volts and is connected by the classic DC 2.1 mm plug with negative pole-center. The current draw is less than 30 mA.

The Echolab is equipped with a mechanical switching system with anti-pop filter.
